

How do I create and save a Walkabout?

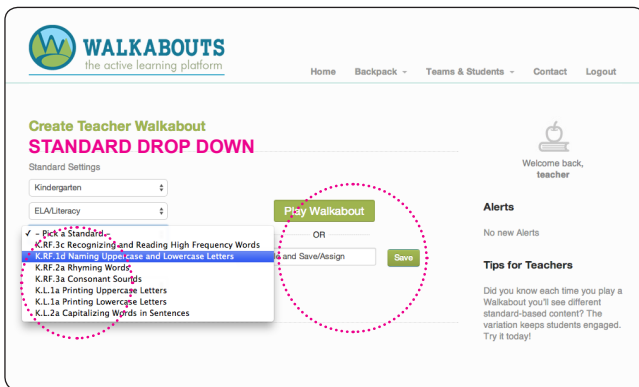

Creating and saving a Walkabout is simple and takes just a few seconds.

Once you login, click on the **Create** button on your dashboard or home page.

Next use drop down menus to select **grade**, **subject** (English Language Arts or Math) and **standard** settings for your Walkabout. Finally, add a title to save your Walkabout, or just click **Play**.

The Walkabout will then begin playing within the player window. If you'd like to view full screen, just click the icon in the lower right corner of the player.
